

## INNOVER-EAST

Building a more effective pathway leading from research to innovation  
through cooperation between the European Union and Eastern Partnership  
countries  
in the field of energy efficiency

FP7 - Grant Agreement No.: 609570

Coordination and Support Action

### WP5 – Dissemination

## Introduction

This document aims at summarizing the dissemination activities of the INNOVER-EAST project in all possible fields. The document will provide a collection/analysis of the most important general dissemination activities (via the usual channels: newsletters, conferences, social media, etc.) and also highlight some less common channels the project partners used in disseminating and communicating their projects results (TV interviews, high level policy making discussions, etc.)

The document will first summarize the Dissemination Plan (as laid down in D5.1) of the project compiled at the beginning of the project's implementation period then will take a look at the Dissemination Activities Template that was used to collect the information from the partners by the Task Leader CERTH.

In the next section a general summary of the results will be given. Since the INNOVER-EAST project used some extra channels to present itself and its result these highlights will be analyzed in the fourth section. Conclusions will be drawn in the last section of the document.

## 1. Dissemination Plan

The dissemination plan based on the analysis of the data provided by the partners identified the following dissemination channels:

- Dissemination at various events: project partners intended to participate in average in 3 local events, 3 conferences and 2 workshops organized by other organizations/projects
- Electronic dissemination: also important dissemination tool for the partners since they intended in average to send 3 newsletters and publish in 2 relevant websites
- Dissemination by press: partners declared that they intended to public at least 3 articles and 3 press releases during project implementation
- Finally, social media played an important role for INNOVER-EAST because all partners intended to post at least 5 times on Facebook, at least 4 times on LinkedIn and at least 3 time on Twitter – however, outreach could have been very different in the partner countries, mainly in the EaP (for example, lack of Facebook or Twitter users)

The information to be collected was based on the dissemination questionnaire used in D5.1. The questionnaire had been divided into four main categories and into further sub-categories:

- Dissemination at events (Local Events, Conferences, Workshops)
- Electronic dissemination (Electronic Newsletters, Websites)
- Dissemination on Press (Articles, Press releases)
- Dissemination in Social Media (Facebook, LinkedIn, Twitter, Other websites)

## 2. Dissemination Activities Template

Based on the Dissemination Plan requirements partners implemented their dissemination activities. In order to collect the information for all the activities CERTH as task leader of Task 5.1 prepared and distributed a dissemination activities template. All partners were supposed to keep record of their activities and report them back to CERTH every 6 months by using the template.

INNOVER-EAST Dissemination Activities Template

<b>Partner Information</b>	
Name and Position:	
Affiliation:	
Address:

<b>Electronic Dissemination (issued by other organizations/associations)</b>	
Number of Electronic Newsletters	
Number of Websites	

<b>Dissemination on Press</b>	
Number of Articles *	
Number of Press Releases **	

\* Minimum 3 articles in each EPC

\*\* Minimum 3 press releases in each EPC

<b>Dissemination in Social Media</b>	
Number of posts on Facebook	
Number of posts on LinkedIn	
Number of posts on Twitter	
Number of posts on other websites (ex. CORDIS, EC Energy)	

  

<b>Other Dissemination Activities (describe)</b>

Fig 1. INNOVER-EAST Dissemination Activities Template (old version)

However, approximately mid-time into the project implementation period it was decided by WP5 that a new, excel template should be used to facilitate the collection of data at project level.

Fig 2. INNOVER-EAST Dissemination Activities Template (new)

The introduction of the new, excel-based template was warmly welcomed by the project partners and it was used for reporting until the end of the project. While introducing the new template a so-called Dissemination Group was set up to make communication among the

Task leader and the rest of the project partners easier as each partner delegated one member of its staff to this group. The aim of this group was the effective collection of all the dissemination activities of the partners regarding the project. Unfortunately, the collection of the data was not an easy task nevertheless the dissemination group was collaborating well.

As it will be shown in the next chapter a satisfactory amount of data was collected, however, many dissemination activities took place without being recorded by the dissemination group.

### 3. Results

The collected indicators for all partners are summarized in the following table. For better understanding of the implemented activities by the consortium the indicator are categorized by the type of the dissemination activity.

Project partners were keen to disseminate the results of the project and they used all kinds of dissemination channels. As it is shown in the above mentioned table the dissemination activities took place exceed the expectations of the Dissemination Plan (D5.1).

INDICATORS																
Description of indicators	TOTAL	BZN	AREA	BELAPE	BeISA	ENECA	IFNTUOG	SDEWES	EAI	CREATE-NET	SDF NAS RA	CPEE	ICEG	CERTH	INTRASOFT	EE&EP
<b>Dissemination at Events</b>																
number of dissemination in Local Events	51		1	1	5	4	5	3	10	5	7	6		1		3
number of dissemination in Conferences	41	2	2		3		6	2	5	5	2	5		2	3	4
number of dissemination in Workshops	41	4		1	7	2	5	1	5	5	4	3		1	2	1
<b>Electronic Dissemination</b>																
number of dissemination in Electronic Newsletters	24		2				3		3	3	2	6	2			3

number of dissemination in Other Websites	13	2		2				1	3	3		2				

Fig 3. Summary of the INNOVER-EAST dissemination results

#### 4. Highlights

Based on the dissemination data shown in the table above it is obvious that some of the partners were the leaders of the dissemination activities in specific categories of dissemination. More specifically:

- In Social Media dissemination leading partners were the coordinator BZN (20 on Facebook) and INTRASOFT (26 on Twitter and 11 on LinkedIn)
- In Press dissemination leading partner was EE&EP (6 Articles and 6 Press releases)
- In Electronic dissemination leading partners were Bellsa (22 on Websites) and CPEE (6 on Electronic Newsletters)
- On Events dissemination leading partners were EAI (10 on Local events), IFNTUOG (6 on Conferences) and Bellsa (7 on Workshops)

It is necessary to emphasize the efforts of Eastern Partnership partners of the consortium for their remarkable efforts for the dissemination of the project in their countries.

The role of some less common dissemination channels during the project's lifetime should also be mentioned.

- IFNTUOG and EE&EP had several sessions on local and national TV
  - e.g.: IFNTUOG's latest appearance during the Final Events of the project (16-18 May 2017 in Ivano-Frankivsk, Ukraine: <http://new.trk.if.ua/news/%D0%B2-%D1%83%D0%BD%D1%96%D0%B2%D0%B5%D1%80%D1%81%D0%B8%D1%82%D0%B5%D1%82%D1%96-%D0%BD%D0%B0%D1%84%D1%82%D0%B8-%D1%96-%D0%B3%D0%B0%D0%B7%D1%83-%D1%82%D1%80%D0%B8%D0%B2%D0%B0%D1%94-%D0%BC%D1%96%D0%B6/>
  - e.g.: INNOVER-EAST's latest appearance on Georgian TV channel "Caucasia": <https://www.youtube.com/watch?v=2gVyTG2v450>
- EE&EP managed to organize workshops with two Georgian Ministries (see Annex)
- BZN as coordinator organized joint events with the cluster projects of INNOVER-EAST, namely ener2i, NoGAP, IncoNet EaP and SECURE-R2I (see Annex) where the project was promoted and discussed

## Conclusions

Unfortunately, the collection of the data was not an easy task nevertheless the dissemination group was collaborating well. However, when Task Leader realized that the collection process might be facilitated by designing a new dissemination template it was shortly implemented.

Generally speaking the project reached and in some fields exceeded the planned number of activities and was able to add new, interesting ways of engaging with the public audience. While compiling materials to be promoted an extra attention had been paid to the proper use of all the dissemination elements (logos, colours, presentation template, brochures, etc.)

## Annex

In the following list are the most important dissemination activities done during the project implementation.

No	Title	Date	Place	Type of audience	Size of audience	Countries addressed	Other remarks
1	H2020 Info Day	6/11/2014	NAS RA		105	Armenia, EaP	
2	Armenia study on research-to-innovation bottlenecks in promotion of energy-efficiency/ Validation workshop	10/6/2015	NAS RA		30	Armenia	
3	EaP Info Day on Horizon 2020 &Energy/Environment	06 - 07/07/2015	NAS RA		60	Armenia, EaP
